

Recommended Software

The music players that come with Windows or Mac OS do not support automatic playback of original sample rates. If your PC or Mac has the digital output set to 44.1k, then all music will be sent out at that sample rate including your just download 24/96 songs. There are several players for both Windows and Mac that will output all your music at its native sample rate for superior sonic performance, here are a couple we have found to be top performers.

Windows (XP, Vista and Windows 7)

JRiver – Media Center 16

- sound quality
- automatic sample rate switching
- plug-ins

Mac OS X

Amarra – Junior, Mini, Full

- sound quality
- automatic sample rate switching
- works with iTunes
- native FLAC playback
- **Junior** goes up to 96k, **Mini** goes up to 192k, **Full** works with all sample rates

Pure – Music Player

- sound quality
- automatic sample rate switching
- native FLAC playback
- works with all sample rates
